SUMMARY

I am a third-year Software Engineering student seeking a software engineering internship to enhance my skills through practical experience, learning, and active involvement. With a strong interest and C++ knowledge in competitive programming and data structures, I am passionate about solving complex problems and exploring new technologies. I aim to continuously improve by adapting to challenges, gaining hands-on knowledge, and growing as a developer.

EXPERIENCE

Back End Developer

FPT Software

January 2025 - March 2025, Ho Chi Minh City, Viet Nam

- Participated in a training program focused on teamwork, communication, and structured software development processes.
- Contributed to a real project by converting legacy code from VB6 to C# and designing report templates. This experience gave me hands-on exposure to enterprise development and improved my ability to collaborate in a team environment.
